Orange, Connecticut 06477 | (203) 435-0804 | me@moojig.dev

LinkedIn: [linkedin.com/in/moojigbc](https://www.linkedin.com/in/moojigbc) | Github: github.com/moojigc | Portfolio: moojigbc.com

Full-stack web developer, leveraging a background in economics and mathematics to write more efficient code. As a well-organized and detail-oriented coder, I have contributed greatly to past projects by writing efficient, understandable code, which has helped me and my team quickly identify and fix bugs in our project.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SCSS || **Web Technologies/Frameworks:** React.js, jQuery, AJAX || **Database and ORM:** MySQL, Sequelize, MongoDB, Mongoose || **Server Technologies:** Node.js, Express.js, Passport.js, RESTful API Design, Handlebars.js || **Version Control:** Git, GitHub || **Deployment Tools:** Heroku, Travis CI

PROJECTS

ProjectKanri | github.com/moojigc/ProjectKanri | projectkanri.herokuapp.com

- A project management single page web application (SPA). A user can create a project, create tasks associated with that project, invite other people to collaborate via email, restrict other members' edit and delete permissions, and assign them to different tasks.
- Responsible for the database modelling and back-end user authentication and interaction with the client-side, and a few pages on the front-end.
- Node.js, Express.js, MongoDB/Mongoose. React.js, Material UI.

All for One | github.com/moojigc/all-for-one | all-for-one-msg.herokuapp.com

- A server-rendered content aggregation website, similar in concept to Reddit.
- You can sign up and see posts from your local area, comment on them, and make your own text or image post. Sole member responsible for the back-end, including converting plain HTML to Handlebars templates.
- Node.js, Express.js, Handlebars, MySQL/Sequelize. jQuery, W3Schools CSS Framework

IntelliDnD | github.com/moojigc/intellidnd | intellidnd.com

- A web application that helps users manage their characters for the tabletop fantasy game, Dungeons & Dragons. My personal side project.
- Started out as a Discord bot - now also a web application integrated with the same database so users can seamlessly use either platform. Originally written in JavaScript, now in TypeScript.
- Discord.js API, MongoDB/Mongoose, Node.js, Express.js, Passport.js, Handlebars. jQuery, Materialize CSS Framework

WORK EXPERIENCE

Front End Web Developer (contractor)

July 2020 - **Current**

Salusion | salusion.com

Remote

- Create responsive, mobile-friendly React components. Eliminated need for a certain bloated NPM library by rewriting custom components from scratch.
- Create email-compatible HTML templates in-line with company branding and image.

Patient Service Coordinator

Sept 2018 - Oct 2019

Oronoque Eye Care

Stratford, Connecticut

- Managed patient appointments, insurance verification, customer service issues, and assisted doctors with examinations.

EDUCATION

University of Connecticut, Stamford, Connecticut: Certificate in Full Stack Web Development

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, JavaScript, jQuery, Bootstrap, Heroku, Node.js, MySQL, MongoDB, Express.js, Handlebars.js & React.js

New York University, New York, New York: Bachelor of Arts in Economics
