Education

UConn Coding Boot Camp	**Feb. 2020 to July 2020**

Certificate Full Stack Web Development 2020

New York University	**Sept. 2014 to May 2018**

B.A. Economics 2018

Employment

**Salusion	salusion.com**	**Connecticut/Remote**
Front End Developer (Contractor)	**July 2020 to Current**

- Work with React.js to create beautiful, response components in a large, existing codebase.
- Refactor existing React code.
- Create email-compatible HTML templates in-line with company branding and image.

Oronoque Eye Care	**Stratford, CT**
Patient Service Coordinator	**Sept. 2018 to Oct. 2019**

- Managed patient appointments, insurance verification, customer service issues, and assisted doctors with examinations.

Projects

**ProjectKanri	github.com/moojigc/ProjectKanri	projectkanri.herokupp.com**	**June 2020 to July 2020**

- A project management single page web application (SPA).
- A user can create a project, create tasks associated with that project, invite other people to collaborate via email, restrict other members' edit and delete permissions, and assign them to different tasks. I was responsible for the database modelling and back-end user authentication and interaction with the client-side, and a few pages on the front-end.
- Back-end tools: Node.js, Express.js, MongoDB/Mongoose. Front-end tools: React.js, Material UI.

**All For One	github.com/moojigc/all-for-one	all-for-one.herokuapp.com**	**May 2020**

- A server-rendered content aggregation website, similar in concept to Reddit.
- You can sign up and see posts from your local area, comment on them, and make your own text or image post. I was the sole member responsible for the back-end, including converting plain HTML to Handlebars templates.
- Back-end tools: Node.js, Express.js, Handlebars, MySQL/Sequelize. Front-end tools: jQuery, W3Schools CSS Framework

**IntelliDnD	github.com/moojigc/intellidnd	intellidnd.com**	**Mar. 2020 to Current**

- A cross-platform web application that helps users manage their characters for the tabletop fantasy game, Dungeons & Dragons.
- Started out as a Discord bot, now also a web application integrated with the same database so users can seamlessly use either platform.
- Back-end tools: Discord.js API, MongoDB/Mongoose, Node.js, Express.js, Handlebars. Front-end tools: jQuery, Materialize CSS Framework
